Tabula

For Ag Contractors

75%
less admin

"We wanted to cut admin time and increase accuracy. Tabula dropped our admin from two days a month to just four hours. That's time we get back in the field."

SCOTT WILSON | Multi Ag Solutions, Waimate

Beyond GPS guidance.

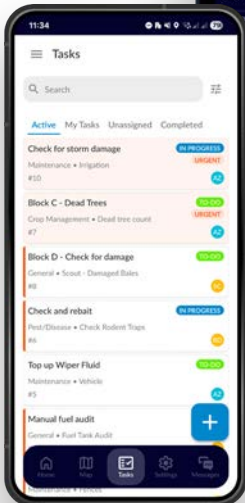

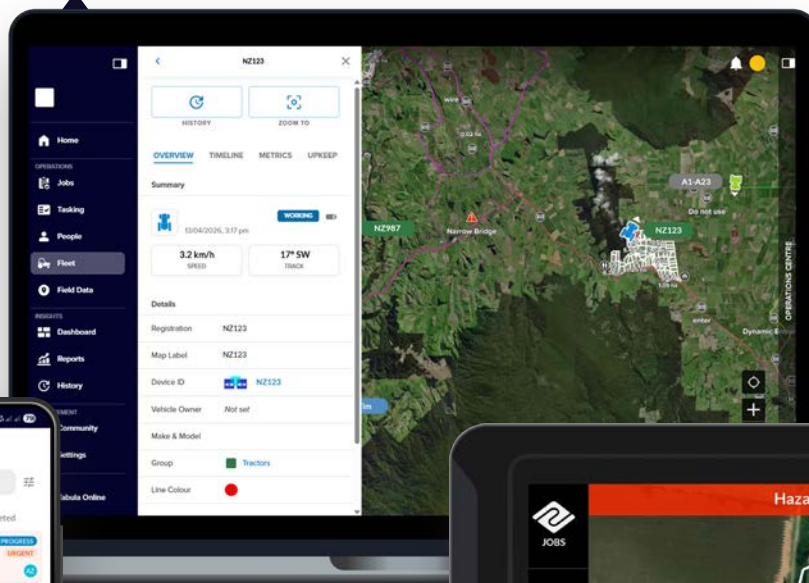

A better way to run your operation.

Everything connected.
Working as one.

Tabula brings your entire operation together in one connected system — from the operational centre, to the cab and the field. Plan jobs clearly, guide operators in real time and capture all work as it happens, whether in the vehicle or on foot.

With everything connected, crews stay aligned, work keeps moving and every job is accurately recorded. Less chasing details, less admin and full confidence that nothing has been missed.

 **TABULA LIVE**

 **FIELD SUPPORT APP**

 **TABULA GROUNDVISION TABLET (GVT)**

You can't be everywhere. But Tabula can.

Bring every part of your operation together in one connected system.
See how work flows from planning through to completion.

1. Plan ahead

Plan work clearly, assign crews and share key information from the start. Set up jobs, maps and site details so everything is ready to run.

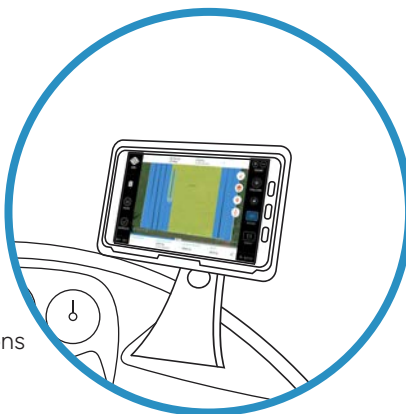

3. Track progress

Monitor progress live, track performance and stay alert to hazards and changing conditions as work unfolds.

2. Run the day

Guide operators, keep work connected and running smoothly in the field with clear instructions and live updates.

4. Record work

Record jobs, timesheets and field activity in one place, and simplify reporting with proof you can trust.

NO
missed jobs

"Everything flows seamlessly to Xero - no missing jobs, no lost revenue."

BENJI PERRY | Precision Spraying, Otago

Built for the way you work.

A complete set of tools to support your operation.

Job Management & Mapping		
Job Management & Scheduling	Plan, assign & track every job across your operation.	p6
Proof of Application (POA)	Capture accurate data including location, date, vehicle and application details for customer reporting, audits and compliance requirements.	
Farm & Infrastructure Mapping	Create maps of a customer's properties, detailing infrastructure and facilities.	
Tracking & Navigation		
Live Tracking	View current and historical data for vehicles with a GVT or a tracker.	p7
Tabula Navigate	Guide operators from job to job with navigation that re-routes around hazards and restrictions to keep work moving.	p8
Operations & Coordination		
Whiteboard	Share job and site information visually in one place across your Tabula system.	p9
Ops Planning Tool	Plan work on a private whiteboard before sharing with crews.	
Task Management	Manage & track tasks beyond the vehicle via Tabula Live or the Field Support App.	
Tabula Messaging	Personalised instant messaging based on operator login, across all Tabula devices.	p10
Community & Neighbour Notifications	Notify neighbours before activity and record property-related feedback in one place for audits and reporting.	
Timesheets	Keep timesheets accurate and easy to manage.	p11
Health & Safety		
Hazard Management	Share hazards and cautions for properties and routes across all Tabula devices, with pop-up alerts on GVT.	p12
SOS	Send instant SOS alerts from the cab or Field Support App with automatic location sharing, so you can respond quickly and coordinate incidents.	
Fleet Management		
Operational Checklists	Complete checks in the field using tailored checklists on the Field Support App.	p13
Fleet Management Notifications	Set usage-based maintenance reminders for individual assets.	
Field Data Capture		
Observations	Log observations, with GPS location, for future reference or follow-up task creation.	
Field Data Capture	Manage inventory and field data by location. Update quantities as they change, so you always know what's where without manual logbooks.	p14

Plan the day right. Get the work lined up.

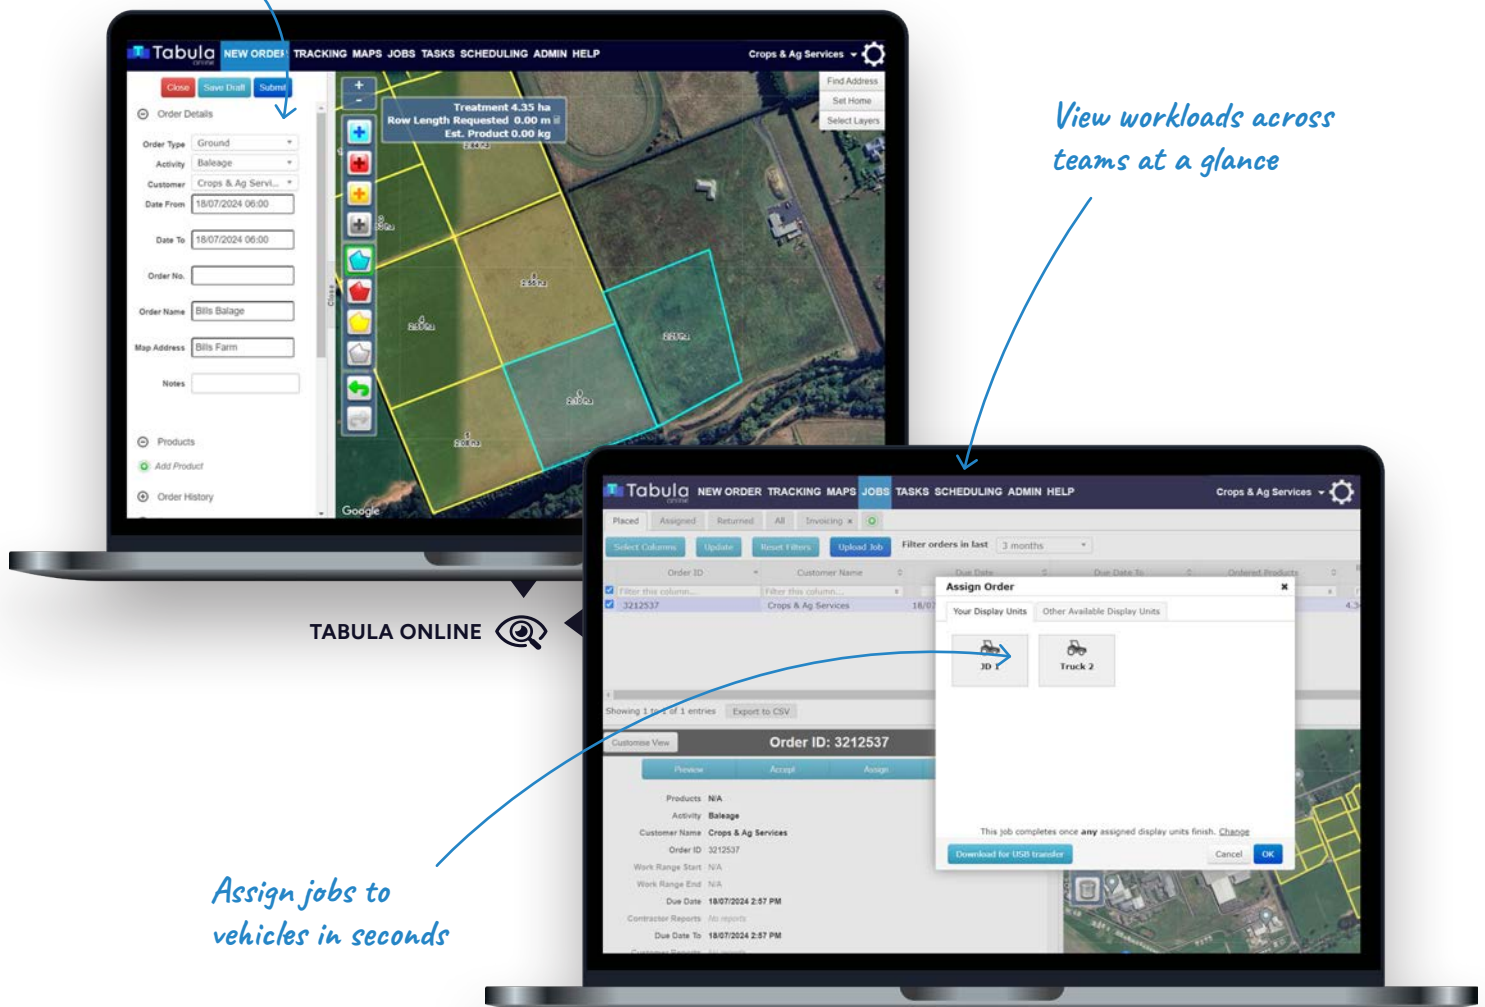

Set up jobs and
schedules in one place

Plan, schedule and assign work in one place, so your team starts the day ready to go. With everything set up from the outset, you reduce confusion, avoid delays and keep work moving. As plans change, adjust quickly and keep schedules on track.

Create and schedule
jobs in one place

View workloads across
teams at a glance

Assign jobs to
vehicles in seconds

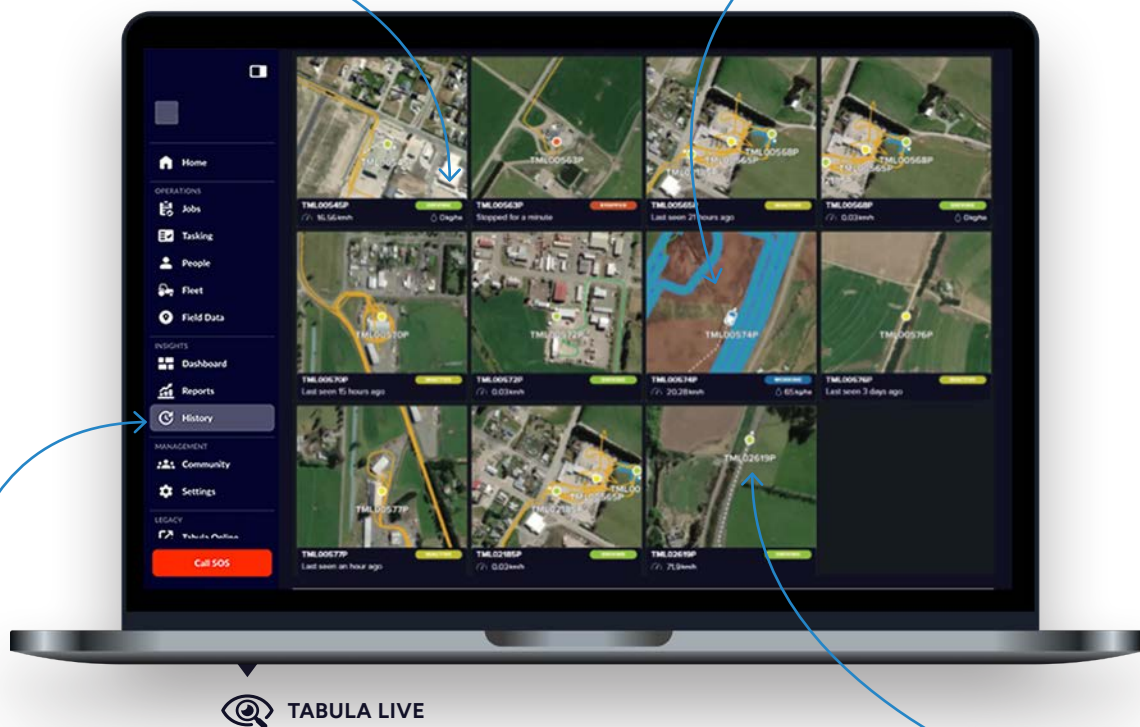

Know what's happening. As it happens.

See jobs, vehicles and
crews in real time

Stay on top of every job as the day unfolds. With Tabula, you can see vehicles, crews and equipment in real time, so you can respond quickly, reduce delays and keep everything running smoothly.

Monitor speed, movement
and time on site

See where work has been
completed at a glance

View historical
activity for review
and investigation

See all vehicles
and crews in
real time

Track vehicles
and equipment via
tablets or trackers

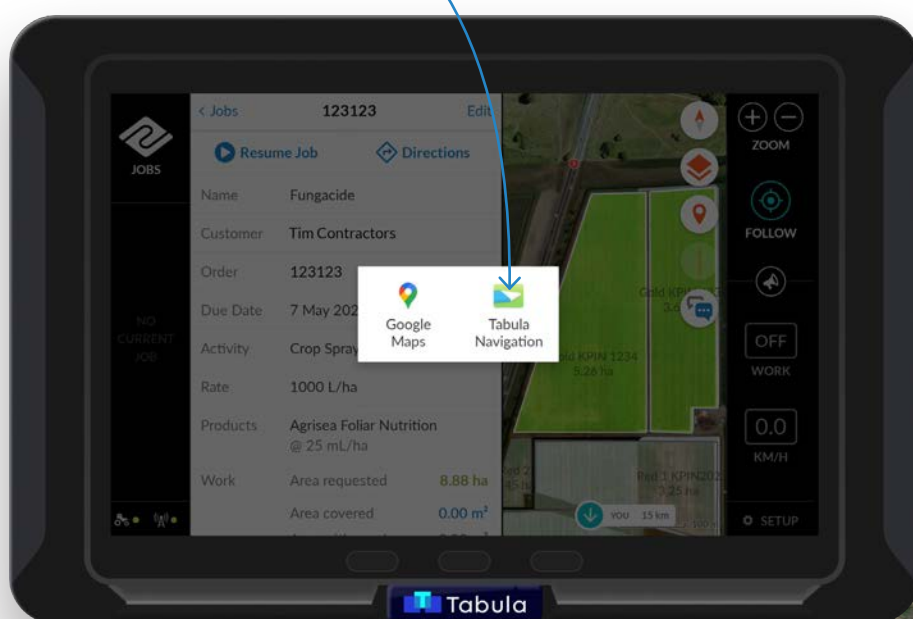

G70 TRACKER

Get there safely. Avoid the hold-ups.

Navigate safely with
real-time hazard alerts

Guide operators from job to job with navigation built for real conditions. Tabula Navigate checks routes against live hazard data, re-routing around risks and restrictions to keep work moving. Set how hazards influence routes and define safe distances to match your operation.

*Select Tabula Navigate
to follow turn-by-turn
navigation to each job*

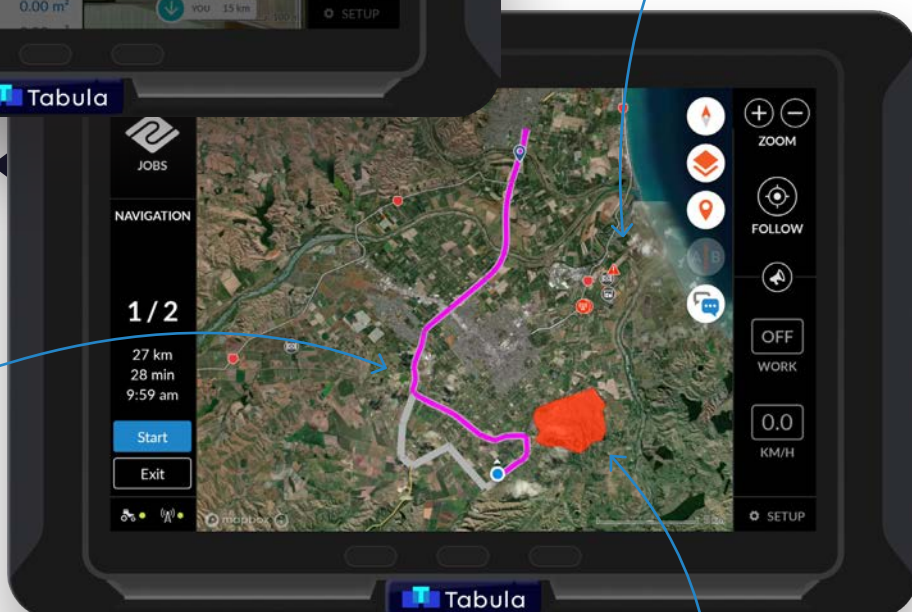

*Check routes against
live hazard data*

TABULA GVT

*Automatically re-route
around hazards and
restrictions*

*Set how hazards
influence routes*

Keep everyone aligned. One place for the details.

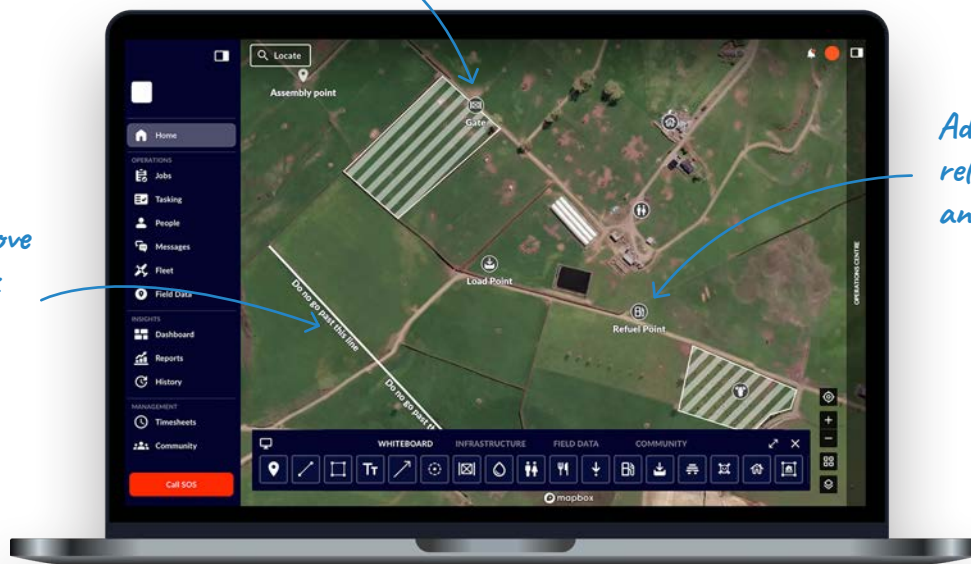

Share key job and
site information

Keep your team aligned with the information they need, when they need it. With Whiteboard, key job details, site notes and updates are shared in one place — so everyone sees the same information and work runs smoothly.

Use drawings and markers to
highlight important information

Update or remove
details as work
progresses

Add gate codes,
refuelling points
and site notes

 TABULA LIVE

See all updates on a
single shared map layer

Access Whiteboard from
Tabula Live, GVT and the
Field Support App

 TABULA GVT

 FIELD SUPPORT APP

Message your team. Without leaving Tabula.

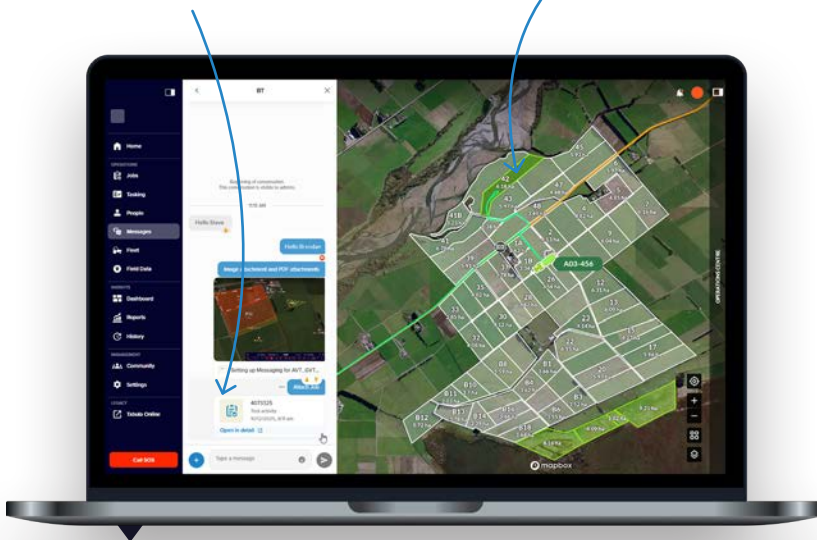

Keep conversations
connected to the work

Link messages to jobs, tasks, vehicles and people, so your team can see the full picture and act quickly — without chasing details across multiple apps. Share images, PDFs and updates, keep communication clear with reactions, and personalise messaging by operator login.

Share images,
PDFs and updates
with full visibility

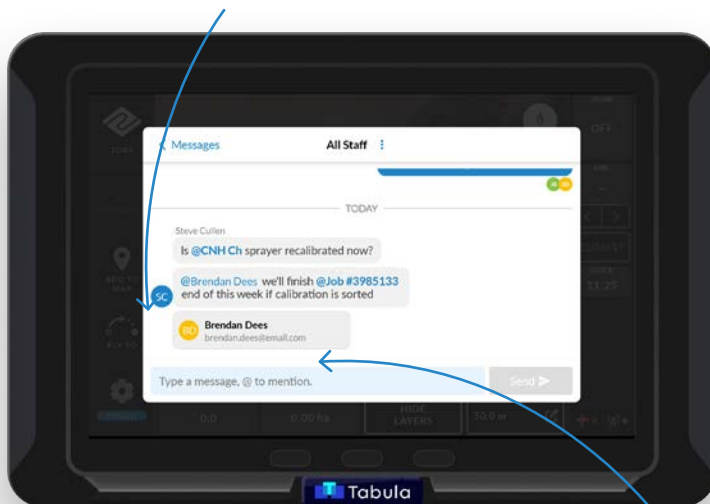

Manage conversations
alongside live jobs and activity

Message 1:1 or in
groups from anywhere
in the field

 TABULA LIVE

Reference jobs, tasks, fleet and people
directly within the message

 TABULA GVT

Message operators
directly – not just devices

 FIELD SUPPORT APP

Send updates
and attachments
in real time

Track time accurately. Cut the admin.

Log, review and approve hours with ease

Keep timesheets accurate and easy to manage from field to office. Employees log hours and breaks in the Field Support App, while managers review, approve and export for payroll — reducing admin, improving accuracy and keeping everything moving.

Log hours and breaks in the Field Support App

Keep accurate records across teams and jobs

Review and approve timesheets in Tabula Live

Submit timesheets directly from the field

The image illustrates the workflow between the Field Support App and Tabula Live. The smartphone screen shows a user logging their shift, including breaks and a note about covering a sick operator. The laptop screen shows a manager reviewing these timesheets and exporting them for payroll. Arrows connect the following text to the corresponding UI elements:

- Log hours and breaks in the Field Support App**: Points to the 'Timeline' section on the smartphone.
- Keep accurate records across teams and jobs**: Points to the 'Jobs' and 'People' sections in the Tabula Live sidebar.
- Review and approve timesheets in Tabula Live**: Points to the 'Timesheets' section in the Tabula Live sidebar.
- Submit timesheets directly from the field**: Points to the 'Confirm and Submit' button on the smartphone.
- Export timesheets for payroll in CSV format**: Points to the 'Export' button in the Tabula Live interface.

FIELD SUPPORT APP

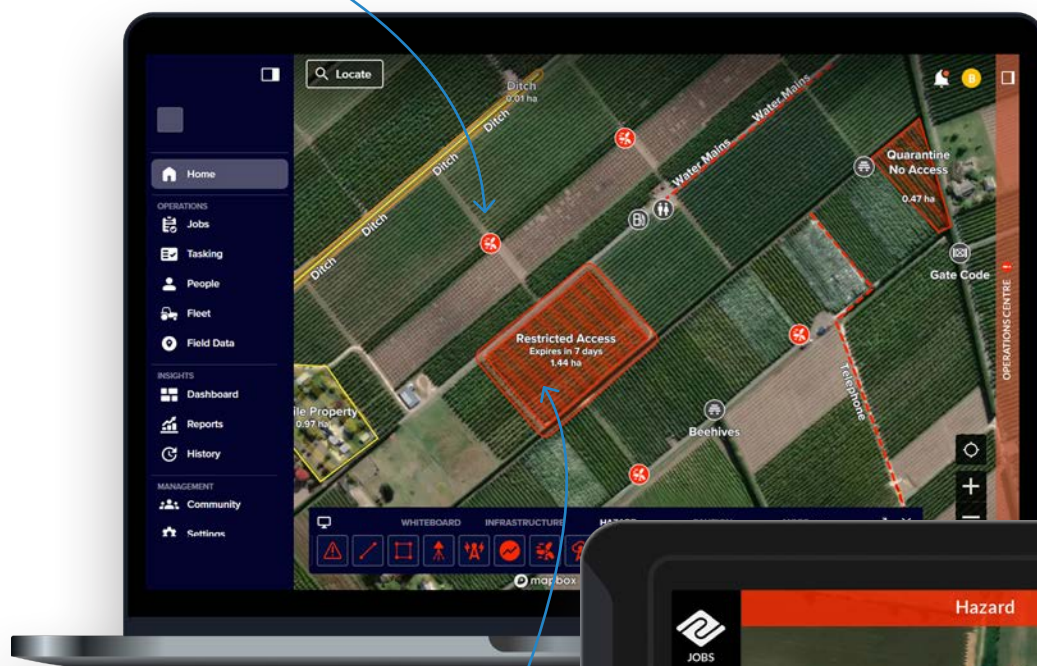

TABULA LIVE

See the risks. Work safely.

Define hazards and
no-go zones clearly

Make hazards, no-go zones and restrictions visible across every job. With Tabula, operators can clearly see where risks are — helping them avoid mistakes, work safely and apply work correctly, every time.

*See hazards clearly
on the map*

 TABULA LIVE

*Trigger alerts when
approaching hazards*

 TABULA GVT

*Identify no-go zones
and restricted areas*

*Highlight risks such as wires,
obstacles and boundaries*

Start every job right. Get the checks done.

Tailor and manage checks for people, vehicles and tasks

Make checks flexible and easy to manage across your operation. Tailor checklists to each vehicle or task, whether it's a pre-start, risk assessment or in-field check, and capture responses as work is done.

Turn notes into tasks and send to the right person

Store completed records for review and audit

Capture operator and asset checks in one place

Tailor checklists to each vehicle or task

TABULA LIVE

Ops Forms > Spreader Truck Pre-Start

Form name: Spreader Truck Pre-Start

Description: Daily safety, fluid and spreader checks before each shift

Questions:

Question	Answer
Safe to drive?	Yes / No
Tires in good condition and pressure correct?	Yes / No
Engine oil and coolant levels OK?	Yes / No
All lights and indicators working?	Yes / No
Brakes and air pressure check OK?	Yes / No
Spreader bin clean and hydraulics operational?	Yes / No
Reverse alarm and horn working?	Yes / No
