Tabula

For Mosquito and Vector Control

“

We use Tabula to bring together all aspects of our operation from field data to aerial spraying, in real time, it's allowed us to work more efficiently and ensure we're capturing the information we need to make confident, informed decisions.

CHRIS LESSER | Director, Manatee County Mosquito Control District

Real-time visibility. Zero guesswork.

Stay in control with Tabula's all-in-one connected system. From the office to the field and back, Tabula gives you the tools to manage jobs, track progress, and stay one step ahead.

Operators get clear, mapped instructions. Supervisors see progress in real time—from trap collection to on-site responses. That means fewer mistakes, faster decisions, and confidence the job's been done right. With every action recorded as it happens, you gain the visibility, traceability and peace of mind to run a smarter, safer operation.

SUPPORT APP

You can't be everywhere. But Tabula can.

Plan the work

Map it once. Everyone's in the loop.

Assign jobs with mapped locations and instant notifications, so your crews know exactly where to go and what to do.

Guide the work

On the ground. On the water. In the air.

Crews follow the same plan and see their progress live: clear instructions, no guesswork.

Track progress as it happens

Live oversight. Smarter decisions.

Monitor your field operations in real time. Spot issues early and keep things moving.

Record what's been done

Every job logged. No loose ends.

From treatment records to one-off tasks, everything's captured, sorted and ready for audit and compliance.

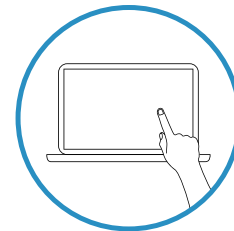

In-field support from your phone

Everything they need, right in their pocket.

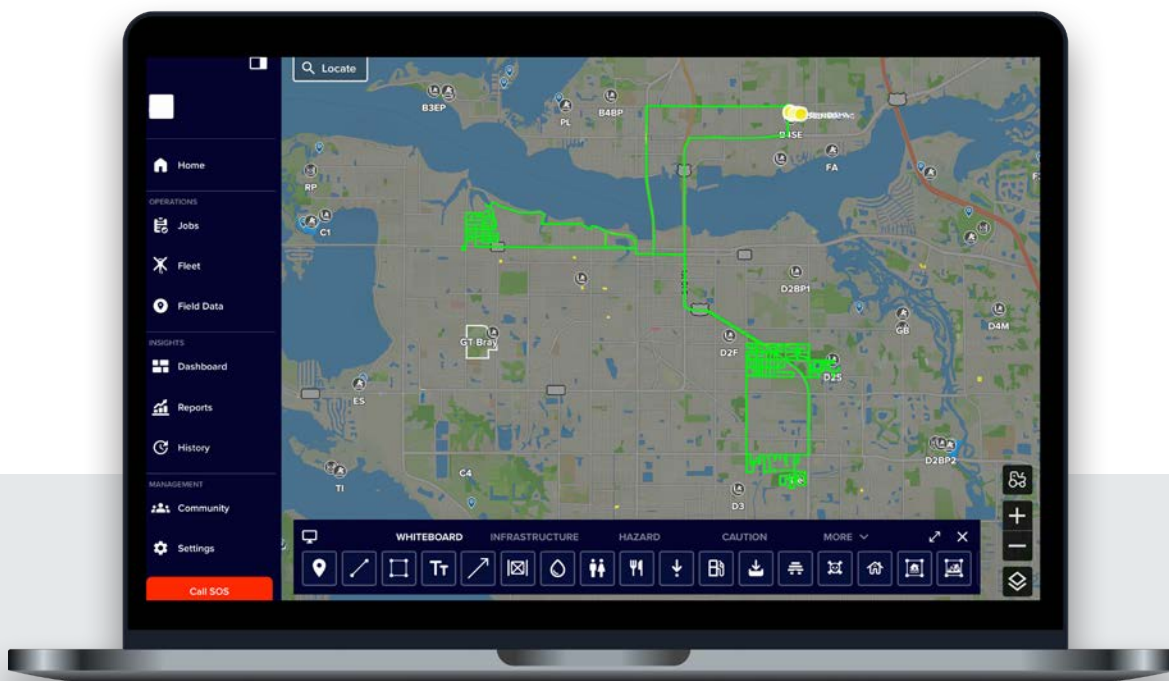

With the Tabula Field Support App, crews can log trap counts and landing rates, record readings, respond to customer requests for service, and log observations on the go. Photos and notes are saved with GPS for easy follow-up.

Ditch the whiteboard pen. Drop the paperwork.

Swap hand-drawn maps and scribbled jobs for a clear, digital view of your service area and routes.

With Tabula, it's easy to plan and assign work in advance—so your team knows exactly what needs doing, where, and when. Real-time visibility allows exceptions to be immediately identified for quicker response. No more chasing people to confirm instructions. Just clear plans everyone can follow.

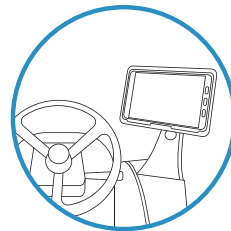

Digitally map route and trap locations

Assign jobs to individual operators with a few taps

Keep the whole crew on the same page, wherever they are

Increase safety with hazard and caution features—from gate code management to hostile property awareness

Guide the work. In the air.

Aircraft

AirVision is Tabula's end-to-end solution for aerial ag operations, combining high-accuracy GPS, job and fleet management, live tracking and proof of application—all designed to support pilot safety and operational efficiency.

Map and assign jobs across multiple aircraft

Real-time visual tracking and communication

Live operations updates for ground crews

Built-in safety and alert features

Drones

Tabula gives aerial ag drone operators the visibility and proof of work they need in a single, connected system—without the paperwork.

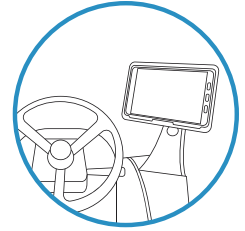

Assign and track every flight

GPS-based proof of application

All your data in one place

Streamline compliance and billing

Guide the work. On the ground.

Ground

Tabula gives mosquito control teams the tools to manage ground-based operations with the same visibility, safety and proof as in the air. From trucks and boats to side-by-sides and backpacks, you'll have one connected system to guide the work and keep crews in sync.

Map and assign ground jobs with GPS accuracy

Real-time tracking of vehicles and crews

Share live updates and instructions from the office

Automatic proof of application for compliance and reporting

Backpacks

Boats

Side-by-sides

The Tabula system supports your full range of ground-based mosquito control operations, including backpacks, boats, and side-by-sides, while giving you the proof of application essential for compliance and confidence. Combined with live visibility of staff and assets, Tabula keeps every part of your program transparent, connected and under control.

Less risk. More peace of mind.

With real-time job data flowing through one system, supervisors and managers stay connected to what's actually happening in the field.

From crew location to task progress, you can make faster decisions and keep your operation moving—without chasing updates. Tabula helps you manage risk and spot issues early by giving you oversight when and where it matters most.

Monitor jobs, vehicles, operators and locations in real time

Spot delays or issues early—before they become bigger problems

Adjust plans or reallocate tasks as the day unfolds

Visually see customer service requests and responses

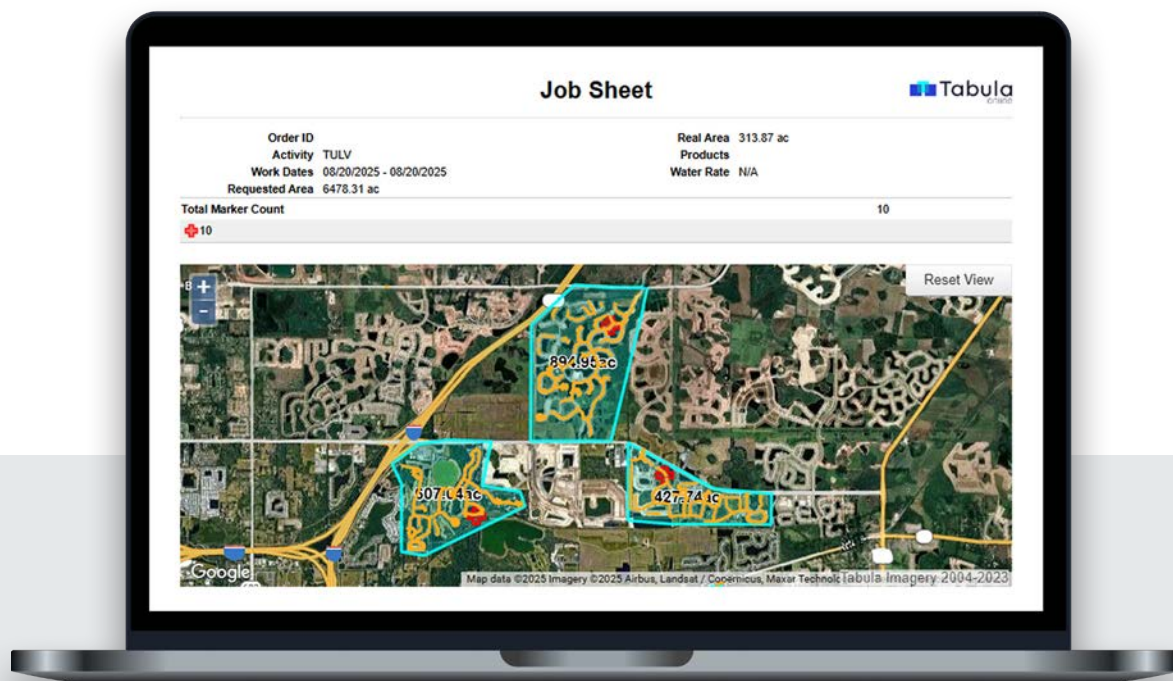

Trigger an instant SOS alert from the cab with the flick of a switch

Proof you can trust. Progress you can see.

The job's done—and you've got the record to prove it. As work happens, Tabula captures every detail automatically.

Every treatment, job and operator is logged and saved with GPS location. No digging through notebooks, no chasing updates. Whether it's audit season, a spray record check or planning for next year, everything you need is at your fingertips.

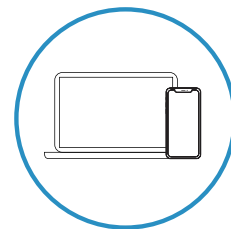

Automatic proof of application tied to location, date, operator and job

Treatment records and activity logs ready to export

Simple reporting for audits, compliance and QA needs

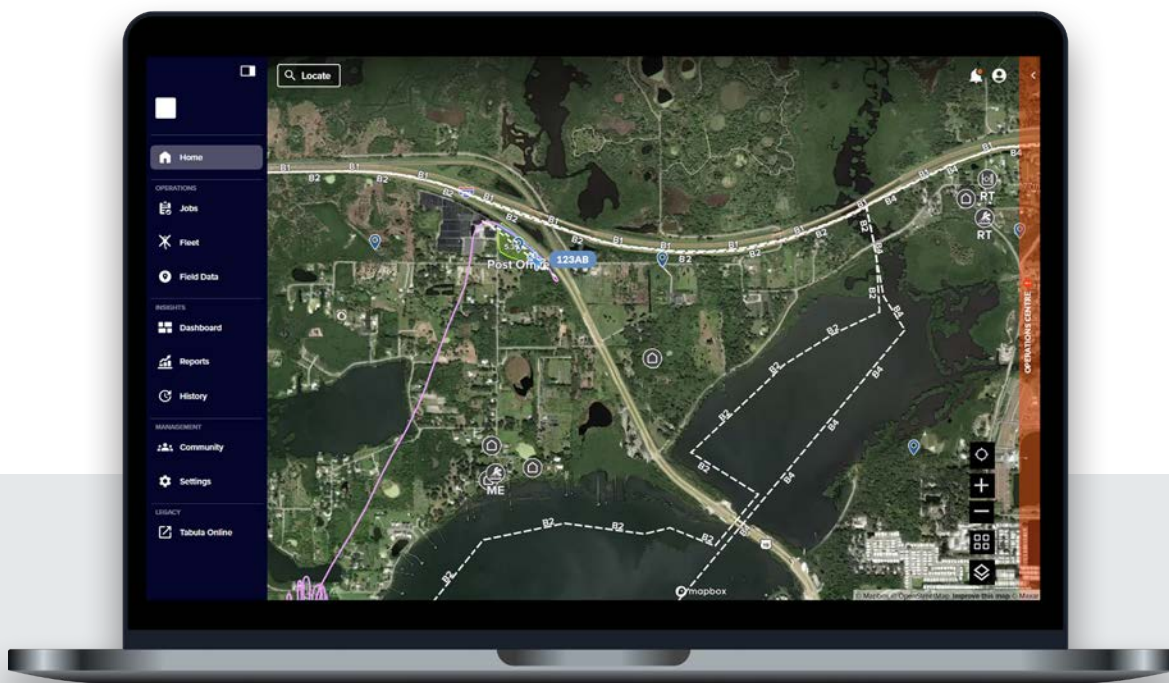

Use past jobs to spot trends and plan smarter

Smarter field work. Streamlined office work.

Tabula Live gives mosquito control teams the data and tools they need to plan smarter and work more effectively—both in the field and in the office.

From trap counts to environmental observations, every detail is captured in one connected system. With powerful field data insights, you can track trends, target treatments, and keep communities safe. That means better decisions today, and a stronger record to guide your programs year after year.

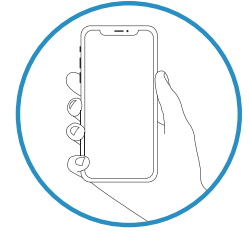

Record detailed species trap data, see 10-year averages, and identify hot spots

View entire trap inventory with location, history and trend data at your fingertips

Capture environmental observations, including rain gauge and landing rate data

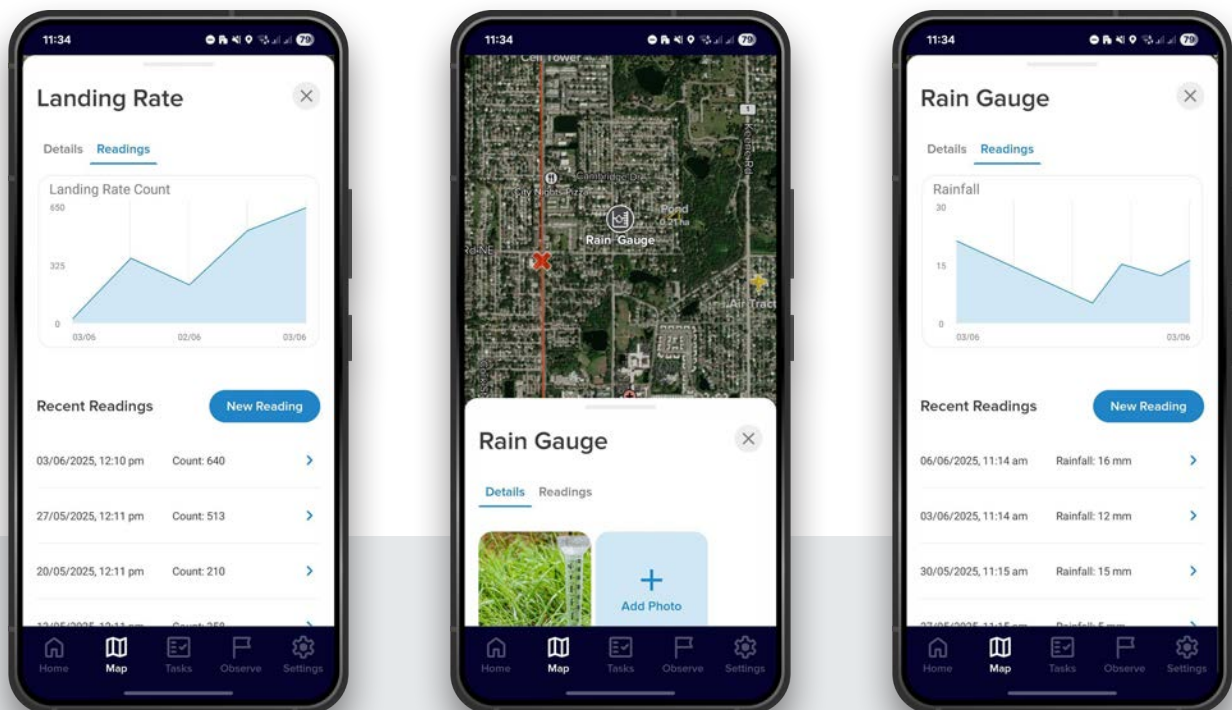

Log and map service requests, schedule site visits and track progress

Stay on task. Record what matters.

Keep your crew moving—with the Tabula Field Support App, your team has everything they need to stay on task in the field.

Crews can view tasks, mark them off, and log what's spotted in the field—all from their phone. Observations from inspectors in the field are recorded with notes or photos and saved to the right location for easy follow-up.

Log observations in the field, like damaged infrastructure or calls to action

Add notes or photos, saved with GPS for easy follow-up or task creation later

See a live task list with mapped locations and clear instructions

Tick off jobs as they're completed—no paper or radios needed

Keep a complete, searchable record of activity and observations
